Despite these developments ethnography remains an
unconventional and little ethnography in an interdisciplinary
context that interweaves anthropology, sociology and
intersection between academic and applied construction
industry research. O'Reilly, K. () Ethnographic Methods,

Ethnographic Research in the Construction Industry draws
together in one volume a set of expert contributions which
demonstrate how social science perspectives, rooted in
ethnographic research on construction sites and with
construction workers themselves, can generate fresh insights

into the social, cultural and material ways that the industry and conditions of work in it are experienced and played. This book will be of interest to students and scholars of anthropology, sociology, geography and organization studies, as well as those from the built environment and related applied fields.
