We will guide readers in a step-by-step fashion through
injections commonly performed around the cervical spine,
including intra-articular cervical facet and medial branch
injections, radiofrequency ablations, and cervical
transforaminal and interlaminar epidural steroid injections.
There are some who are opposed to leaded gloves due to the
false sense of security that they may confer. Step 6: Inject
Medication Inject the recommended medication.

Normal anatomy of the lumbar spine varies in patients. The presence or
absence of concordant pain in response to the injection of
contrast provocative discography 2. Note that the needle is
posterior to the anterior aspect of the thumb-shaped foramen,
but caution is taken not to traverse the vertebral artery.
