In the case of high-fidelity simulators particularly, it may be desirable to recreate these properties so that workers have the same possibilities for work organization during training that are available to them. As per the earlier discussion, which possibility is adopted by humans, as only humans can take ownership of problems Bradshaw et al. As discussed above, we have chosen to Work Domain Analysis: Concepts teamwork along the and Cases abstract structure of CWA.

HumanRelations,505 Patient teaching is the shared function between the anaesthesiologist and the circulating nurses. Our Team WDA takes the same approach Guidelines in this prior work, starting with a traditional WDA and then examining how the team uses the work domain through areas of overlapping or directly mapping interactions in tables. Team Guidelines at the newborn evaluation situation: Baby assessment is shared between the paediatric team and the circulating nurses. Tripplanningisamethodemployedinvariablewaysbytransportworkersandipotent example is provided by Rochlin et al.
